

FFPP – FAQ

1f. Are there any other Federal funds that would still be available?

Yes, under the current federal legislation we expect there will still be a federal-aid transportation program in Nebraska even if the Federal funds purchase program is implemented.

As of the current federal legislation, federal funds would remain available for off-system bridge replacements, the MAPA (Omaha metro) and LCLC (Lincoln) areas, and projects involving emergency relief, transportation enhancement (typically trails and historic building renovations) , safe routes to school, railroad (viaducts), safety, and federal lands highway.

Some or all of this could change depending on what happens with federal legislation in the future.
